**Delignit AG raises revenue guidance for fiscal year 2022**

Blomberg, 20 December 2022. Delignit AG (ISIN DE000A0MZ4B0), a leading manufacturer of ecological, hardwood-based products and system solutions, is raising its revenue guidance for the current 2022 financial year. Despite the challenging development of the current macroeconomic environment, the Delignit Group records a sustained dynamic revenue development in the second half of the year. As a result, the Management Board expects to achieve consolidated revenues of € 74 million and thus significantly exceed the revenue guidance for the full year 2022 published in the 2021 Annual Report. Initially, only slight growth compared to the previous year (€ 68.3 million) was assumed.

In light of price hikes – some of which have been significant – and material bottlenecks, the Management Board is reiterating its original earnings guidance of a slightly lower EBITDA level than in the previous year.
